

MOTORS ON OUTRIGGER CANOES PROVIDE NEW THRILL AT WAIKIKI

George D. ("Dad") Center, Outrigger Canoe Club swimming coach, and some other members of the club have found a new thrill for canoeists at Waikiki. The latest stunt, which has been tried out successfully, is to attach an outboard motor to an outrigger canoe. The motor is not only used to take the canoe out from shore but also provides the power to get a start in catching a wave. "Dad" Center is quite enthused over the new stunt. The above picture shows one of the big canoes with the motor attached. From left to right those in the canoe are: James Cunningham, G. Forrest, Edric Cooke and "Dad" Center. The insert shows how the motor is lashed to the outrigger alongside the canoe.
