

Marble sets a new pace downtown. Here's proof in black and white.

Amfac Center's new decor is a knockout.

And it begins with an entryway utilizing an Art Deco design skillfully blending with modern materials to create a dramatic conversation piece in downtown Honolulu. Home to some of the State's finest businesses, Amfac Center is looking better than ever with its striking black and white marble lobby area. The total ambiance is one of elegance, strength and sophistication — ideal for this prestigious business address.

Let us show you how we can create an image for your next commercial or residential project through the imaginative use of ceramic tile, marble and terrazzo.
