

LOS ANGELES SPRINTER IS EXPECTED TO HANG UP NEW TIME FOR TWO-TWENTY RUN

By THEON WRIGHT

Prospects of a number of new high water marks in island athletics are promising for the coming A. A. U. track and field meet on tap at Kamehameha field for April 1, if marks made at the recent interscholastic affairs are any indication.

Charlie Paddock, world's fastest human, will, no doubt, lower the present island mark for the 220 yards dash which stands at :22.1. The local track is slower than those on the mainland, and Paddock will probably set the mark around :21 flat or a little above. The present record is held by Simon. Milton Beamer, running for the Kamehameha Alumni, has done the distance in :22.2 which is only a fifth of a second above the record, and should be stretched out by the Californian. He ought to make his best time in this race.

The Century

The best any of the island boys, Beamer, Tin Luke Wongwai, Farden and Gaspar, have done in the century is :16 flat. Paddock runs his spasm in :09.3, but is not expected to do better than :09.4 on island tracks and in a new climate. This ~~is~~ the record held by George Watson of the 25th Infantry. The best time ever made in the islands was :09.3 made by Gilbert of the same division, but the record was never allowed.

Paddock will probably keep out of the 440 yard run, in which case there is little likelihood of the standing mark falling. The record his held by L. Ware in :50.2, and the best time this year is that of Miller of the Kamehameha Alumni, who ran the distance last Saturday in :52.4. Kinney of the University may press the Kam man.

The one mile walk record is held by Bill Meinecke of Palama who touched the tape last year in 8:04.2. Meinecke walks again this year and is to have some interesting competition from his own club. He may crack his own record, or one of his competitors may do so. The races should be fast, whoever wins, since the best mile walkers ever seen here will be completing.

In the Field

In the field there are possibilities of five marks being lowered. The pole vault record now held at 11 feet 8 inches by E. S. Andrews, is likely to go by the old route. In the Cornell relay games Wayson Williams, Outrigger, and Sam Hipa, Palama, both slipped over the bamboo at 11 feet 7½ inches, which is but little under the mark. At the same field they should be able to give the record a little excitement.

The high jump record stands at 5 feet 10½ inches, being held by George Lindley. Sam Hipa and Maltbie Holt, both competing under Palama colors, have hopped around 5 feet 8 inches, and with a little extra jazz may clear the bar over the record mark. This record will either fall or remain according to the kind of day the meet falls on.

Broad Jump

The next record that may fall is the broad jump record. The A. A. U. mark for the long leap is 21 feet 11¼ inches, but Lal Tin of McKinley holds the prep school record at 22 feet 6½ inches. The A. A. U. record is in danger of being touched by Crook of Schofield Barracks, 27th Infantry, who glides about 22 feet even, but the high water mark of the island is still reckoned safe.

The 16-pound shotput figure is 40 feet 6½ inches held by Herman Clarke of Kamehameha Alumni. Clarke is competing this year but is apt to be edged by Holbron of Palama, who heaves the marble around 41 feet. Holbron broke Clarke's interscholastic record last Saturday, hurling the 12-pound ball 47 feet 9¾ inches. He is figured to win on April 1.

Either the javelin throw or the discus heave may be broken, although a new figure is not likely. E. K. Pong of Palama made the new record in the old Greek sport last year when he tossed the platter 116 feet 6¾ inches. He is in the game again this year and may clean up and crack his old mark.

The outlook for the meet is one of the brightest any meet ever staged her. Six records and possibly more are booked to be re-~~re-~~nted at the A. A. U. headquarters, and the fastest runner of the world as well as the holder of the world high hurdle mark will be seen in competition. It will be the biggest day in athletics outside of swimming that Hawaii has ever seen, and it should go a long way towards putting Hawaii on the map in cinder and pit sports as well as in the tank.
