# Idea not stupid

Dear editor,

Mary Ann Chester's article (4/2/84) is very misleading. Gov. Ariyoshi's lava barrier(s) is not stupid. It worked at Kapoho until being undermined (due to poor compaction) and filled in Warm Springs.

And the smart one is not Harry Kim. Can we wait until the flow approaches Olu Street before something is done?

Bombing the flow in 1935 and 1942 was successful. Bill Capp, an Outrigger Canoe Club buddy, did a good job. We saw the glow from Diamond Head.

I urgently recommend that Hilo residents request Mayor Matayoshi, Gov. Ariyoshi and Harry Kim to get the wheels spinning now to have the U.S. Air Force ready to bomb the flow on

The experts can locate the proper places to divert the flow of lava to keep it out of forest watersheds and populated areas. The time for corrective action is now, not telling us when and where the lava flow will strike.
